The session schedule and content are subject to change.

Session Summaries

Team Developer 7.1 multi-threading - get insight in how to leverage multi-threading with your TD applications

Learn about the implementation architecture of application multithreading in Team Developer 7.1. See how to debug multiple active threads with Team Developer 7.1. Understand how to implement a thread code exception handling strategy.

Team Developer 7.1 feature details

See how to access popular source code management systems right from within Team Developer 7.1. Learn about the new UX features of Team Developer 7.1 like the new custom theme, .NET WPF controls with Win32/64 apps and image tooltips. View the ACA enhancements and new code navigation capabilities.

SQLBase 12.1 features and benefits

Learn how to use Microsoft VSS enabled volume backups with SQLBase 12.1. Get an overview of the capabilities of SQLTalk Plus, the new data manipulation and testing tool. Understand the benefits of the new SQL functionality in SQLBase 12.1.

TD Mobile 2.2 feature details

See the new source code management features in action. Understand how to use the new global JavaScript functions. See how to use the new custom event actions and data operations having new optional parameters to limit the amount of data being transmitted.

TD Mobile technology deep dive

This session teaches advanced use of TD Mobile client side technologies and APIs and answers questions like: How can I dynamically create fields on a form? How can I re-use operations to fill multiple return binds and more.

Discover insights hidden with your organization's data

Build comprehensive reports that can be based on multiple data sources including SQLBase. Use the powerful WYSIWYG report editing feature to create great looking documents. See how to share reports with your organization or with customers.

Team Developer and TD Mobile integration with eDOCS and other OpenText products

Get an idea of how to integrate OpenText eDOCS document management with Team Developer applications. See how to access documents from the document repository and how to post new versions of documents to the eDOCS document repository.
